a
CDDM, N = 1,000, 3 networks
reach threshold
low-active
active
silent, training noise
units
incoming-weight gradient
(95th percentile = 1)
3BFF, N = 1,000, 3 networks
b
CDDM
3BFF
units reached / active units
reach threshold (% of the 95th percentile)
c
3BFF
CDDM
learning rate / 10
low-active units reached
iteration
d
gradient share common to 32 batches
iteration
e
noisy training loss / final
iteration
